SIZE CHART HOW TO

HOW TO SIZE GUIDE- SHIRTS

1.Pick a similar item:

• Choose a garment that's the same style – e.g. compare a tee with another tee, not a singlet.

2. Lay it flat:

Place the garment on a flat surface, smoothing out wrinkles.

3. Measure the chest (Half Chest Measurement):

- Measure 2cm down from where the armpit seam meets the body.
- From that point, measure straight across the chest to the other side seam.
- This is your half chest measurement.

4. Check the size chart:

 Match your half chest measurement to the size chart to find the best size.

5. Measure the length (Body Length)

- On the back of the garment, measure from the centre of the neck seam down to the bottom hem.
- This is your body length.

HOW TO SIZE GUIDE- SHORTS

1.Pick a pair of shorts:

• Choose a pair you already own and love the fit of. Measuring helps because every style fits differently.

2. Lay them flat:

• Place the shorts on a flat surface and smooth them out.

3. Measure the waistband (Half Waist Measurement)

- With the waistband relaxed (not stretched), measure straight across from one side to the other.
- · This is your half waist measurement.

4. Check the size chart:

• Use your half waist measurement to find the right size on the chart

5. Measure the leg length (Outside Leg Length)

- Measure from the top of the waistband down the side seam to the bottom hem.
- This gives you the outside leg length.
